## TECHNICAL INFORMATION:

|                                       |   |
|---------------------------------------|---|
| Throughput:                           | 40-60 t/h, 130 m <sup>3</sup> /h              |
| Drum diameter:                        | 1500 mm                                       |
| Drum length:                          | 3000 mm                                       |
| Screen size:                          | various, standard with 40mm <sup>2</sup> mesh |
| Measures:                             | W=2466 mm, L=6078 mm, H=3000 mm               |
| Weight:                               | 2700 kg                                       |
| Compatible:                           | SUV or heavy equipment trailer coupling       |
| Towing speed:                         | max 20 km/h                                   |
| Permissible mass to trailer coupling: | min 300 kg                                    |
| Drive:                                | diesel and electric                           |
| Screening materials:                  | soil, compost, crushed stone, wood chips      |
